React Developer   MAY 2023 - Present

IThreads

Led frontend development for IThreads, an enterprise asset management system, utilizing React.js to create responsive and interactive user interfaces. Collaborated with backend developers using C# and .NET Core Web API for seamless integration. The system facilitates asset, spare parts, and supplies management with a primary focus on service automation. Managed various modules such as Masters, Indent, Inward to ensure efficient asset tracking and service management. Designed user-friendly mobile apps for service requests and asset monitoring. Implemented clear reporting features for data analysis, enhancing decision-making processes. Additionally, developed dynamic web application menus based on user roles (Manager, Employee, Supervisor, Admin, Executive), enabling customized menu access for different user types. Demonstrated expertise in frontend development, asset management, service automation, and mobile app development.

- Design, develop, and maintain scalable and responsive user interfaces using React.js.
- Led the frontend development of IThreads, collaborating with backend developers to ensure seamless integration.
- Integrated frontend with .NET Core Web API to enable efficient data exchange between the frontend and backend.
- Ensured high performance and responsiveness of the application through code optimization and UI enhancements.
- Debug frontend issues encountered during development and in production environments.
- Documented frontend components, API integrations, and usage instructions to facilitate seamless collaboration among team members.
- Efficiency in code reviews to maintain code quality and ensure adherence to coding standards.
- Worked closely with UI/UX designers to implement design mockups and ensure consistency in the user interface.

Tech Breakthrough | Coimbatore

React Developer   FEB 2022 - MAR 2023

Personal projects

Ecommerce Online Shop

I have done eCommerce online shop application using React and Next Js. it is open source user shopping page and customer's favourite list of products selected to add a cart and finally buy a product to directly online payment with card transactions.

Order Choosy Food

I have developed a food order application in which you can easily order food online. By looking at the types of popular dishes on this website, and you can see what special products are available today. You can also see how the customers reviews.

Hotel Reservation Management

I have developed a hotel reservation management application using React in which you can easily booking at hotel rooms online. Its looking at the categories of countries restaurant details on this website you can also check it. And finally you will pay that card transaction on directly online method.

Admin Dashboard

I have developed the Admin Dashboard application using React. In this application for Ecommerce admin management. Admin can handle list of order details ,employee details and also customer details. Admin can work with CRUD operations of all modules. Admin can see how many employees are working in a company, how many projects are going there and how many products order with customer details. finally how much is the company's annual earnings, revenue updates and recent transactions.

I have developed responsive portfolio blog. It contains all my details and projects also. You can easily download my CV.
